

An extensive safety management track record in Japan and abroad

The **GX-3R** portable monitor can measure four gas components found in the water supply and sewage system in a single device: oxygen (O₂), hydrogen sulphide (H₂S), carbon monoxide (CO) and combustible gas.

In addition to the integrated Bluetooth® function, the **GX-3R Pro** can also measure sulphur dioxide (SO₂) or carbon dioxide (CO₂) in addition to the other four components.

The lightweight, palm-sized housing is dust and waterproof (corresponds to protection class IP66/68) and is certified as an intrinsically safe, explosion-proof design. Ideal for protecting the precious lives of your employees.

Portable Gas Monitor

**Model:
GX-3R**

Portable Gas Monitor

**Model:
GX-3R Pro**

Features

- The **GX-3R Pro** can communicate with smartphones and tablets via Bluetooth®. Allows alarms to be issued to remote locations in real time to notify emergency situations using the dedicated RK Link app.
- Can be attached to the arm or to a belt; does not interfere with work.
